- a) quieter b) quietlier c) more quietly

_____ (25 points)

II READING

Read about the climate in Madagascar on a travel website. Then circle true or false.

Madagascar – When to go

Madagascar has two seasons, a warm, wet season from November to April, and a cooler dry season between May and October. However, different parts of the country have very different weather.

The east coast is hotter and wetter, with up to 4000mm of rainfall per year. In the rainy season, there are strong winds, and these can cause a lot of damage. Avoid visiting eastern Madagascar between January and March because the weather can make road travel very difficult. The dry season is cooler and more pleasant.

The high, central part of the country is much drier and cooler. About 1,400 mm of rain falls in the rainy season, with some thunderstorms, but the summer is usually sunny and dry, but it can be cold, especially in the mornings, with freezing showers, and it may snow in mountain areas above 2,400m, and even stay there for several days.

The west coast is the driest part of the island. Here, the winter months are pleasant with little rain, cooler temperatures and blue skies. The summers can be extremely hot, especially in the southwest. This part of the country is semi-desert, and only gets around 300mm of rain per year.

1 Madagascar has four seasons: spring, summer, autumn and winter.

True False

2 There is more rain in January than in June.

True False

3 The wet season is colder than the dry season.

True False

4 It hardly ever rains in central Madagascar.

True False

5 The wettest part of the island is the east.

True False

6 January-March is a good time to visit eastern Madagascar.

True False

7 The centre of Madagascar is the coldest part.

True False

8 Snow sometimes falls in Madagascar.

True False

9 The west coast has the best weather in December.

True False

10 The north-east is hotter than the south-east.

True False
